Heading: Sprint 3 Review, TP, TimeLords, 12 July 2016, #1, 26 July 2016

Sprint 3 Report
Task Planner **by TimeLords**
7/26/16

Actions to stop doing:
- The team should stop

Actions to start doing:
- The team should start collaborating more

Actions to keep doing:
- The team should keep communicating

**Sprint 3 User stories || Work Completed:**

1. (2) As a user I want to be able to **organize my tasks into projects** so that I can separate tasks and view them more easily.
2. (8) As a user I want to **add Task attributes, and easily edit them** to distinguish them.
3. (2) As a user I want to be able to **mark tasks as done** so that I know what tasks I have completed
4. (2) As a user I want to be **able to add notes to each task** so I can have a place to put other relevant information not provided by the pre-existing list of attributes
5. (3) As a user I want an user interface that allows me to **swipe from the menu page to other pages *flawlessly***, so I can navigate through the application
6. (13) As a user I want the **app to REMEMBER my tasks when I exit the app** because otherwise it would be completely useless to even use this app.
7. (5) As a user I want a "dump" page to hold all of my tasks that are not organized into a project so that I can create tasks not assigned to a specific project (the default project will be the dump)
8. (1) As a user I want to be able to attribute an estimated length to my tasks so I (and later the app itself) can identify quick tasks easily
9. (1) As a user I want to be able to set priority levels for each of my tasks so I know what the most important tasks are.
10. (1) As a user I want to be able to "tag" my tasks so that later I can search and find all tasks with that tag.
11. (3) As a user I want a collapsible list of projects in my menu so that I can navigate the application easily
12. (3) As a User I want to **access a list of completed projects** so I can look at what I've been doing with my life and either cry with joy or sadness

13. (5) As a user I want to be able to add projects from all pages so that I have to do less navigating
14. (5) As a user I want to be able to have a *satisfying* animation when I "complete" a task so that I can feel good about myself and my accomplishments.
15. (8) As a user I want a **sleek and intuitive graphic interface** so that I can use the app efficiently.
Work Not Completed:
- (8) As a User I want **access to a list of recently completed tasks** so I can reflect on my productivity.
- As a user I want an user interface that allows me to **swipe from the menu page to other pages *flawlessly***, so I can navigate through the application
- (13) As a user I want the **app to REMEMBER my tasks when I exit the app** because otherwise it would be completely useless to even use this app.
- (1) As a user I want to be able to attribute an estimated length to my tasks so I (and later the app itself) can identify quick tasks easily
- (1) As a user I want to be able to "tag" my tasks so that later I can search and find all tasks with that tag.
- (5) As a user I want to be able to add projects from all pages so that I have to do less navigating
- (5) As a user I want to be able to have a *satisfying* animation when I "complete" a task so that I can feel good about myself and my accomplishments.
- (3) As a user I want to be able to delete projects in case I fux up
- (5) As a user I want to be able to delete tasks to declutter lists.
